

# SAMUEL ADEROGBA

Full-Stack Developer & UI/UX Designer | Computer Engineering Student

08146998074 | [aderogbasameuladeolu@gmail.com](mailto:aderogbasameuladeolu@gmail.com) | [samueladerogba.vercel.app](https://samueladerogba.vercel.app) | [linkedin.com/in/samuel-aderogba-6952aa338](https://linkedin.com/in/samuel-aderogba-6952aa338) | [github.com/aderogbasamuel](https://github.com/aderogbasamuel)

Computer Engineering student at the University of Lagos and co-founder / lead frontend developer of Starkstores, a peer-to-peer escrow-based marketplace for students. 2nd runner-up at the NiTHub Innovation Fair 24-hour buildathon, building a fintech tool for informal traders under real time pressure. Balances startup building, class leadership, and academics through disciplined prioritization — currently expanding into full-stack development and applied AI.

## TECHNICAL SKILLS

- Frontend:** HTML, CSS, JavaScript, TypeScript, React.js, Next.js
- Backend / Data:** Node.js, Express, Firebase, Supabase (expanding into full-stack)
- Systems / CS Fundamentals:** C, Data Structures & Algorithms
- Design:** Figma (UI/UX)
- Tools:** Git, GitHub, VS Code, Vercel

## EXPERIENCE

- Co-Founder & Lead Frontend Developer — Starkstores** 2026 – Present  
*starkstores.com.ng*
- Co-founded a student-focused escrow-based marketplace addressing trust and safety in peer-to-peer campus commerce
  - Lead frontend development end-to-end: migrated the platform to Next.js (App Router), built the Paystack payment flow, and implemented the buyer delivery-confirmation escrow mechanic
  - Own product direction alongside co-founder, who leads backend/ops
- Web Development Instructor — TechEd** 2025
- Taught web development fundamentals to students, covering HTML, CSS, and JavaScript
- Web Developer — Motoka, Lagos** 2025  
*motokaapp.ng*
- Designed and developed a full website for the Lagos-based startup, from brief to deployment
  - Handled client communication, UI/UX design (Figma), and frontend development end-to-end

## PROJECTS

- Tracko — NiTHub Innovation Fair 24-Hour Buildathon** 2026 · 2nd Runner-Up
- Sole developer on a team that built a tool helping informal traders track sales and manage debts — who owes them and who they owe — using the bmoni fintech API
  - Designed and shipped a working product end-to-end within a 24-hour constraint
- C ATM Simulator**
- Console-based ATM simulation in C with login authentication, balance checks, deposit, and withdrawal functionality
- Vibekitz — Content Creation Tool for Creators**
- Web-based toolkit helping creators design carousels, quote graphics, and profile covers without traditional design-tool complexity
- MeshLib — OPay National Innovation Challenge**
- Built an offline-first knowledge network for Nigerian campuses using Raspberry Pi seed nodes and Bluetooth/WiFi-Direct mesh propagation, enabling zero-data academic content distribution
  - Delivered a full interactive React/TypeScript demo alongside pitch materials as part of a 5-person team

## EDUCATION

- B.Eng. Computer Engineering**  
*University of Lagos (UNILAG)*  
2025 – Expected 2030
- Class Governor, Computer Engineering Department

## LEADERSHIP & ACHIEVEMENTS

- 2nd Runner-Up, NiTHub Innovation Fair 24-Hour Buildathon (2026)
- Class Governor, Computer Engineering Dept., UNILAG
- Overall Best Student throughout secondary school
- Best Graduating Student — JSS3 and SS3
- Head Boy — Primary & Secondary School
